ALPHABETICAL AUTHOR AND TITLE INDEX

This index contains entries or reference entries under authors, titles (where they are not explanatory of the subject matter of the books), editors, translators and series in one alphabetical sequence.

The entry under the author gives, in an abbreviated form, most of the information to be found in the entry in the classified section, so that for most purposes it is not necessary to refer back to that entry when the author of a book is known. If, however, a fuller description is required, the entry in the classified section—which gives the fuller description—can be found by means of the decimal reference number at the end of the author entry.

If the editor, translator, title or series only is known, it will be necessary to refer back to the entry in this index under the author's name. For example, if you look up the title *Beauchamp's career*, you will find the entry:

Beauchamp's career by G. Meredith.

To find details of this book and its reference number, it is necessary to refer to the entry in this index under

Meredith, G. Beauchamp's career. *O.U.P.*, 7/- · 823.8 (*50-9954*)

If you wish to know what books have been published on a particular subject it is necessary to consult the alphabetical subject index which begins on page 663.
